

Oracle Grid Infrastructure Architecture

Oracle Clusterware concept

What is Cluster?

What is Clusterware?

Oracle Clusterware Architecture and Services.

Oracle Clusterware Networking

Oracle Clusterware Architecture

Oracle Clusterware startup

Oracle Clusterware Process Architecture.

Grid plug and Play

GPnP Domain

GPnP Components

GPnP Profile

Grid Naming service

Single Client Access Name(SCAN name)

ASM Architecture

ASM and ASM Cluster File System

ASM keys Features and Benefits

ASM Instance Design

Nonclustered ASM and Oracle Database

Clustered ASm and Clustered Database.

ASM system privileges

ASM OS GROUP with Role Separation

Authentication for Accessing ASM Instance

Using single OS Groups

Using separate OS Groups

ASM Disk Group

ASM failure Group

ASM files

ASM Extents and Stripping

ASM Mirroring

Grid Infrastructure Installation

Pre Installation Planning

Shared Storage Planning for Grid Infrastructure

Sizing Shared Storage

Storing the OCR in ASm

Oracle Clusterware Repository(OCR)

Managing Voting Disks in ASM

- CSS Voting Disk function
- Oracle Clusterware Main log files
- Installing ASMLib
- Preparing ASMLib

Grid Infrastructure Pre Installation Tasks

- Oracle Grid Infrastructure Installation
- Checking System Requirements
- Checking Network Requirements
- Software Requirement Packages
- Creating Group and Users

Grid Infrastructure Installation

- Installing Grid Infrastructure
- Grid Plug and Play support
- Cluster Node Information
- Specify Network Interface Usage
- Storage option Information
- Privileged Operating System Groups
- Installation and Inventory locations
- Prerequisite Checks
- Finishing the Installation
- Verifying the Grid Infrastructure Installation

Administering Oracle Clusterware

- Managing Oracle Clusterware
- Controlling Oracle Clusterware
- Verifying the status of Oracle Clusterware
- Determining the location of Oracle Clusterware Configuration files
- Backing Up and Recovery of Voting Disks
- Adding, Deleting or Migrating Voting Disks
- Locating the OCR Automatic Backups
- Changing the OCR Automatic Backups Locations
- Adding, Replacing and Repairing OCR Locations
- Performing Manual OCR Backups
- Recovering the OCR by Using Physical Backups

Managing Oracle Clusterware

- Adding New Nodes in Clusterware
 - Requirements to Add a new node in Cluster
 - Steps to add a new node in a Cluster
- Deleting a Nodes from a Clusterware
 - Requirement for removing a node from a Cluster.
 - Steps to remove a node from a Cluster.
 - Non RAC to RAC Database.
 - RAC to Non RAC Database.

Administering ASM Disk Groups

- Objectives

Disk Group Overview
Creating a New Disk Group
Creating a New Disk Group with ASMCMD
Disk Group Attributes
V\$ASM_ATTRIBUTE
Compatibility Attributes
Features Enabled by Disk Group Compatibility Attributes
Support for 4KB Sector Disk Drives
Supporting 4 KB Sector Disks
ASM Support for 4KB Sector Disks
Viewing ASM Disk Groups
Viewing ASM Disk Information

Cache Fusion Concepts and Theory.
